# Playground Replacement

## Age

The cost to fix our current structures are greater than the cost to replace them and the structures no longer meet recommended state guidelines.

---

## Safety

We currently have one play structure closed since the parts to fix it can no longer be purchased.

---

## ADA & Inclusive

Our current structures do not accommodate the abilities of all children and each site requires one playground with a poured-in-place composite surface.

Notes:

Sourcewell – No fee piggyback contract purchasing for materials, similar to California Multiple Award Schedules (CMAS)

Omnia Partners, Public Sector – No fee purchasing cooperative for Pour in Place (PIP) Surfacing; existing District account set up on January 15, 2011

Inclusivity – All sites will have at least one playground with PIP and ADA accessible features placed near main play structure areas

# Steps

*\*This process is longer than expected due to supply chain availability. Playworks, Inc. is estimating a nine month or more lead time for delivery of materials after the contract has been signed. Once the materials are delivered at the site, work crews can then be scheduled.*
